Protocol Link Appoints Michael Brown to VP

VERNON HILLS, IL – (June 6, 2008) Protocol Link, Inc., a leading project management and consulting firm to the FDA-regulated life sciences industry, today announced the appointment of Michael D. Brown, PE to Vice President. Mike will serve on the Executive Management Team, and have responsibility for directing all aspects of the company's business development portfolio, devising sales and marketing strategies, and managing client relations.

With more than 12 years of industry experience, Mike, 43, has worked on diverse projects in the pharmaceutical, medical device, biotech, and construction industries. He has held key management positions in engineering and validation for major companies, including Affiliated Engineers, Abbott Laboratories, Pharmacia, and Triad Pharmaceuticals. Mike has considerable expertise in pharmaceutical and quality engineering, validation leadership, construction management, plant operations, lean enterprise management, and facilities engineering.

"Mike brings a solid track record of success, industry experience, and knowledge to Protocol Link, and is a well-respected leader," said Steven Weltler, President of Protocol Link. "Prior to Mike coming onboard, we collaborated on several projects that entailed the development and manufacture of products to protect against biological warfare agents, along with key process validation assignments. In each case, Mike enhanced our services offering, and we are confident he will continue to add tremendous value to our organization."

About Protocol Link
